

HERCULES™

PATIENT REPOSITIONER

Allows a single caregiver
to safely reposition a patient up in bed
with the simple push of a button

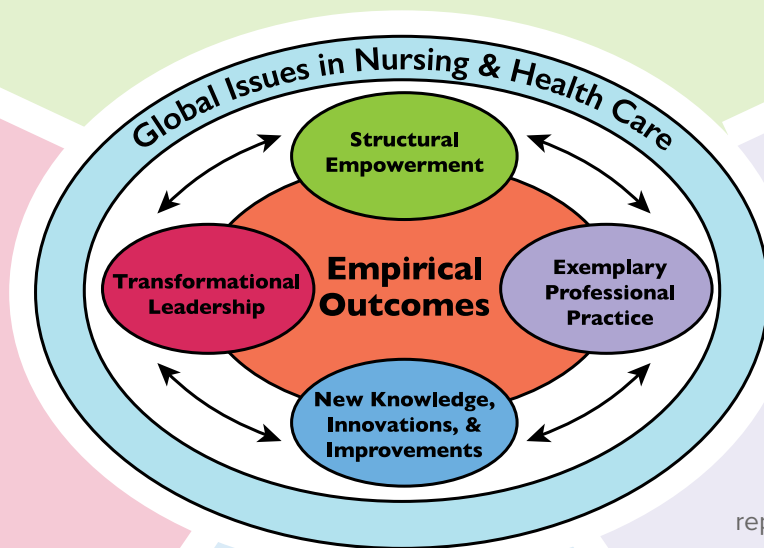

A NEW WAY TO REPOSITION EVIDENCED BY OUTCOMES

STRUCTURAL EMPOWERMENT

1EO Hercules drives inter-professional decision-making regarding equipment to drive efficiencies (1 nurse repositioning in seconds vs. several nurses & multiple minutes)

TRANSFORMATIONAL LEADERSHIP

9EO Hercules demonstrates CNO advocacy for nursing workforce safety

EXEMPLARY PROFESSIONAL PRACTICE

3EO Nursing satisfaction (adequacy of resources and staffing) increases when workforce injuries decrease

18EO Hercules directly addresses and improves the #1 workplace safety issue for nurses – repositioning

22EO HAPU risk decreases because caregivers reposition more frequently with Hercules

23EO Patient experience improves because Hercules eliminates the pain and discomfort of traditional repositioning and because caregiver response time for repositioning improves

NEW KNOWLEDGE, INNOVATIONS & IMPROVEMENTS

5EO Nurse implementation of Hercules innovative technology demonstrates the use of technology to enhance the patient experience (less pain and greater responsiveness with repositioning) and improve your nursing practice (timely repositioning)
