

Now available for the Isoflex® mattress\*

**Hercules Patient Repositioner™**  
**PATIENT AND CAREGIVER BENEFITS**

- Keeps all therapeutic functionality of your existing Isoflex® mattress—provides non-powered pressure redistribution and shear management by incorporating ShearGel technology with an open column design for enhancing Microclimate Management
- Improves pressure relief in less than 10 seconds with the push of a button
- Allows one caregiver to safely boost the patient every time they enter the room
- Helps maintain the patient's proper position in bed without hoisting, turning or inflating
- Allows boosting while the head-of-bed is elevated to help maintain airway clearance—beneficial for COPD, ventilator and aspiration risk patients
- Helps improve caregiver satisfaction
- Improves the patient experience by boosting without disruption—no need to remove sheets from patient and tug and pull on draw sheet, slide sheet or inflated positioning device
