

Now available for the TotalCare® Bed*

Hercules Patient Repositioner™
PATIENT AND CAREGIVER BENEFITS

- Keeps all of the therapeutic functionality of your existing TotalCare® mattress—weight-based pressure redistribution with microclimate, turn assist, CLRT, percussion and vibration
- Improves pressure relief in less than 10 seconds with the push of a button
- Allows one caregiver to safely reposition the patient every time they enter the room
- Helps maintain the patient's proper position in bed without hoisting, turning or inflating
- Allows repositioning while the head-of-bed is elevated to help maintain airway clearance—beneficial for COPD, ventilator and aspiration risk patients
- Helps improve caregiver satisfaction
- Improves the patient experience by repositioning without disruption—no need to remove sheets from patient and tug and pull on draw sheet, slide sheet or inflated positioning device
