

Hercules Dream SheetTM

The Hercules Dream Sheet is designed to provide the safest and most comfortable environment for today's healthcare patient. The sheet's patented technology provides an extremely soft fabric with enhanced breathability and thermoregulation helping your patients get the most restful sleep possible.

COOLING & MOISTURE MANAGEMENT

Increased sweating can make sheets damp and uncomfortable. The Hercules Dream Sheet uses micro-fiber technology to help transfer body heat and improve moisture management, resulting in sheets and skin that remain drier and cooler ensuring a better night's sleep.

SKIN SAFE

Hercules Dream Sheets are woven from a continuous filament making them less abrasive than traditional poly-cotton sheets, resulting in less friction/shear and less skin irritation for your patient.

DURABLE & STAIN-RESISTANT

Hercules Dream Sheets are made from 100% synthetic fabric making them more durable and stain resistant than traditional healthcare poly-cotton sheets meaning your sheets will last five times longer.

PERFECT FIT

Sized to provide the perfect fit to minimize wrinkling.

SPECIFICATIONS:

- Repositions patients weighing up to 750 lbs.
- Size: 42" x 192"
- Fabric: 100% synthetic fabric
- Color: white with blue hem
